Class Title	Subject	Instructor(s)	Start Time	End Time	Friendly Educators - Class Descriptions 2026-2027
Algebra 1 grades 7-10	Math	Dr. Donna Navey	2:00 PM	3:00 PM	Cost: $320 Course Name:Algebra 1 Course Description: Using materials from Math-U-See, your student will progress through the Algebra Objectives presented in the Math-U-See Curriculum. Each class will cover lesson details and seek to identify any gaps in your child's understanding of the material. The curriculum requires a structured review of the material at home using the textbook, lesson workbook, and video teaching. Samples can be found at Mathusee.com. Course Prerequisites: Pre-Algebra Curriculum used by Instructor: Math-U-See Algebra 1 Books & Supplies required for purchase by families: Math-U-See Algebra 1 Student Workbook, Instruction DVD, Test Booklet, and Instruction Manual Pre-Algebra Level Up Base Set - Demme Learning Store Homework Requirements: Most weeks, students will complete 4 lesson practice sheets and a test at home. These should take 15 to 30 minutes each. There will be periodic comprehensive unit reviews in class. Duration: 28 weeks Grading: Parents are responsible for grading. The test booklet will not be used during class time, so the pages can be utilized at home. Lessons will be introduced and practiced in class. Cumulative reviews of the material will be given to the students at various times during the year. Course Credit: 1 math credit Method and Frequency of communication: The instructor will be available for any questions and will communicate expectations regarding coursework.

Algebra 2 grades 10-12	Math	Jennie Weekley	12:00 PM	1:00 PM	Cost: $300 Using materials from Math-U-See, your student will progress through 28 lessons covering topics such as exponents, factoring polynomials, the Quadratic Formula, graphing conic sections, graphing linear equations, word problems and more. There is alsoa lot of review from Algebra 1 that is covered. In class each week, we will go over that lesson in class before your student returns home to do the rest of the worksheets and the test at home. They will read the next lesson in the book and bring the first worksheet and the test back for grading along with homework. A project each semester is required and Unit Tests are taken in class. Please preview Math-U-See Algebra 2 on their website and talk to the tutor before signing up as needed. ISBN 9781608263431 Student Workbook ISBN9781608263493 Test Book Math U See Student pack PLUS Instruction Manual (Ebay or Amazon Used, DVD is optional) ISBN 9781608260393 Calculator (TI-84 if possible) Course Prerequisites: Algebra I and Geometry Homework Requirements: 1-4 hours per week. Grading: A-F Homework 10%, Quizzes or Honors Pages 5%, Project 10%, Weekly Tests 15%, 2 Unit Tests 30% each in each semester. Semester grades will be averaged to get final grade. Course Credit: High School 1 credit Method and Frequency of communication (how often will you communicate with families/students and via which method i.e. email): Each week I will send an email with homework

All about the Ocean grades K-2	Science	Courtney Whelan	2:00 PM	3:00 PM	Cost: $235 Explore the Wonders of the Ocean! Course Description: Come dive into the amazing world beneath the waves! In this fun, hands-on class, students will explore the ocean and discover the secrets of life under the sea. We'll learn about the different ocean zones, how ocean currents move, and meet the incredible plants and animals that call the ocean home. Students will learn the difference between fish and mammals and discover how ocean animals swim, breathe, communicate, and live in their watery world. We'll also explore the deep sea to uncover mysterious creatures, hidden treasures, and even sunken shipwrecks! Creativity is a big part of this class! Students will make ocean-inspired art using sand, seashells, and other craft materials. Through books, videos, simple science experiments, and fun discussions, students will take an exciting adventure into the beauty and mystery of the ocean. Throughout the year, students will practice fine motor skills, early math, listening, comprehension, and phonics—all through playful, hands-on activities. This class is designed to keep learning fun, engaging, and meaningful while helping every student stay excited to explore, create, and discover. Supplies Needed: Students will need a 3 hole punch binder, glue sticks, pencils, crayons or colored pencils and a pencil box or pouch. If student is taking more than one class with me only one binder with seperation tabs is needed. Course Prerequisites: There will be short book readings and crafts in most classes so being able to listen and follow simple directions will be helpful during this time. Curriculum: Instructor Created Homework Requirements: None Grading: NA Course Credit: NA Method and Frequency of communication: Email as needed

Around the World in 28 Weeks grades K-2	History/Geography	Lisa Stubblefield, Amanda Elliott	9:00 AM	10:00 AM	Cost: $250 Class Description : Pack your bags and join us on a trip around the world as we learn about the different countries and cultures in God's amazing creation! Learn to race like an Australian kangaroo, craft a Chinese lantern, peek inside the lives of children living in various countries, sample treats from around the world, buy goods at our local market with international money, and more! Most importantly, we will learn how God's people are sharing His love in these diverse cultures. These are just a few of the opportunities waiting for you as you fill your passport in Around the World in 28 Weeks! In this class we will read books, practice light map work, sing songs, craft, taste, play, and learn. Your child does not need to know how to read or write, but should be able to cut, paste, and sit through the reading of picture books quietly. Supplies: Students will need a pencil pouch or box with scissors, glue stick, pencils, and crayons or colored pencils. Homework requirements: N/A Grading: N/A Method and Frequency of communication: Email as needed

Art Through the Ages grades 6-8	Art	Lindsey Poe	1:00 PM	2:00 PM	Cost: $300 This course takes students on a creative journey through the history of art, beginning with ancient cave paintings and continuing through Postmodern art. Students will explore major artistic periods, movements, and cultural influences that shaped visual expression across time. The class includes in-depth studies of influential artists such as Michelangelo, Leonardo Da Vinci, Georgia O'Keeffe, Claude Monet, Edgar Degas, Pablo Picasso, Vincent van Gogh, and many more! Through discussion, visual analysis, and hands-on projects, students will gain a deeper understanding of how artists responded to their time and pushed creative boundaries. Students will recreate artist-inspired works using a variety of techniques and materials developed throughout history, building technical skills while developing their own artistic voice. Curriculum: Instructor-developed Supplies Needed: Drawing/sketch pad, watercolor pad, and a set of watercolors (any brand). All other supplies will be provided. Grading: Not Graded Class Size: Minimum 5 students, maximum 12 students
ASL Vocabulary 1 grades 8-12	Foreign Language	Leslie Lowe	9:00 AM	10:00 AM	Cost:$250 This class is designed for students interested in learning ASL vocabulary. We will have a lot of fun learning and no previous ASL experience is required. Homework is minimal with practicing the vocabulary at home in their daily activities. Grading is a pass or incomplete and is based on minimal amount of quizzes and a large amount of class participation. One email per week will be sent with updates.

ASL Vocabulary 2 grades 9-12	Foreign Language	Leslie Lowe	10:00 AM	11:00 AM	Cost: $250 ASL vocabulary 2 is a continuation of ASL vocabulary 1. Students will expand their ASL vocabulary and still have fun doing it. Homework is minimal with practicing the vocabulary at home. Grading is a pass or incomplete using minimal quizzes and maximum class participation. One email per week with updates will be sent.
ASL Vocabulary Intro 1 & 2 grades 5-7	Foreign Language	Leslie Lowe	12:00 PM	1:00 PM	Cost: $240 This class is loaded with fun and ASL vocabulary! It is designed to both introduce ASL vocabulary and serve as an extension for those who took the intro class in 2025-2026. No supplies are required and homework will be 10 minutes a day practicing ASL vocabulary. Grading will be based on class participation and growth with a pass or incomplete status. Parents will receive one email each week.

Biology grades 9-12	Science	Tyler Slabaugh	12:00 PM	1:00 PM	Cost: $450 Dr. Shormann DIVE Biology Curriculum Student Purchase: DIVE Biology subscription and safety goggles Course Overview This High School Biology course uses the Dr. Shormann DIVE (Digital Interactive Video Education) Biology curriculum to provide a structured, flexible, and lab-focused biology experience. Students complete weekly lessons at home and reinforce learning through hands-on laboratory activities during co-op days. Schedule & Format The curriculum follows a 32-week schedule and is accessed through the DIVE Biology online platform via a 12-month subscription. Students are responsible for completing lessons during non-co-op weeks (such as Labor Day and Martin Luther King Jr. Day). A detailed syllabus schedule will be provided. Weekly Lesson Structure A typical week is organized as follows: Day 1: Vocabulary definitions and reading assignment Day 2: Lecture Video 1 and Digital Worksheet 1 Day 3: Lecture Video 2, Digital Worksheet 2, watch the lab video, and complete the lab worksheet Day 4 (Co-op Day): Work together as a group to review the lab video and carry out a hands-on lab that applies concepts from the previous week's lessons Labs & Materials The course includes approximately 28 labs. Students watch virtual lab demonstrations at home and complete hands-on laboratory activities during co-op, working collaboratively in assigned lab groups. Some labs are exclusively completed virtually due to equipment costs, safety considerations, or the use of live materials. Included in the course fee: Lab Kit Student purchases required: DIVE Biology subscription

Blast from the Past grades 3rd-5th	History/Geography	Courtney Whelan	10:00 AM	11:00 AM	Cost: $250 Come Join Me for an Adventure Through Time! In this class, students will take an exciting journey back in time to learn about incredible people who changed the world. Beginning with ancient times and traveling all the way to modern day, we will study inventors, explorers, pirates, scientists, artists, leaders, heroes, and other important historical figures through engaging stories and age-appropriate books. Through hands-on projects, simple experiments, creative art activities, and group discussions, students will bring the past to life. They may build models, create crafts, and work together to explore big ideas in fun and meaningful ways. Throughout the year, students will strengthen important skills like critical thinking, reading comprehension, listening, and teamwork — all while discovering how the past connects to our world today. This class is designed to make history exciting, interactive, and memorable. Students will stay curious, ask questions, and grow confident as they explore the people and events that shape our world. Supplies Needed: Students will need a 3-hole punch binder, glue sticks, pencils, scissors, crayons or colored pencils and a pencil box or pouch. Curriculum: Instructor-created, using Master Books: Big Book of History as a reference for timeline dates and historical structure. Homework Requirements: No weekly homework. There may be a fun project assigned at some point during the semester Grading: NA Course Credit: NA Method and Frequency of communication (how often will you communicate with families/students and via which method i.e. email): Email as needed

Blast from the Past grades K-2	History/Geography	Courtney Whelan	1:00 PM	2:00 PM	Cost: $235 Course Description: Come Join Me on an Adventure Through Time! In this class, students will travel back in time to meet amazing people from the past who helped shape the world we live in today. We'll explore inventors, explorers, pirates, scientists, artists, leaders, heroes, and other fascinating historical figures through fun stories and age-appropriate books. Students will bring history to life with hands-on activities, simple experiments, creative art projects, and group discussions. They'll make crafts, build simple models, and explore ideas through play-based learning designed just for young learners. Throughout the year, students will practice fine motor skills, early math, listening, comprehension, and phonics—all while having fun discovering the past. This class is designed to keep learning exciting, interactive, and meaningful, helping every student stay engaged, curious, and eager to learn. Chemistry with Lab grades 9-12	Science	Mrs. Ashleigh Absher	9:00 AM	10:00 AM	Class Cost: $475 Course Description: Chemistry with Lab is a comprehensive and engaging course designed for students with little to no prior knowledge of chemistry. Students will be introduced to the fundamental principles and concepts of chemistry that among other things includes atomic structure, chemical bonding, and chemical reactions. Throughout this course, students will develop a strong foundation in chemical concepts, including the properties of matter, chemical formulas, and chemical equations. Course Goals: Students will learn to: Develop critical thinking skills as they analyze and interpret data, solve problems, and conduct experiments Develop essential laboratory skills, including data collection and analysis Safely handle chemicals Have a solid understanding and foundation of chemistry Safely perform a variety of chemical experiments Keep a tidy lab notebook Course Prerequisites: Algebra 1 Books & Supplies required for purchase by families: Apologia's Exploring Creation with Chemistry, 3rd Edition $93 Aplogia's Chemistry Student Notebook (***Optional), 3rd Edition $51 Chemistry Solutions Manual and Tests, $28 Textbook ISBN: 978-1-946506-58-0 Student Notebook ISBN: 978-1-940110-41-7 Chemistry Solutions Manual and Tests ISBN: 978-1-940110-26-4 Curriculum LINK: https://www.apologia.com/subject/science/chemistry/

Christian Black Belt Academy Taekwondo Kids Class grades 2-12	Physical Education	Ryan Frame	9:00 AM	10:00 AM	COST: $240 per SEMESTER paid directly to Christian Blackbelt Academy. You will pay $15 deposit here through homeschool life to secure your spot and then Mr. Ryan will contact you after registration to set up payment. Taekwondo is a Traditional Korean Martial Art, and Christian Black Belt Academy focuses on teaching Leadership and Life Skills as well as developing technique and character. Students learn respect for themselves and others, greater concentration, and increased self-discipline and self control. Students in the Kids program (Grades 2-12) begin with basic techniques, and progress to using Forms (patterns) to develop their skills. Kids class participants also develop power by practicing Board Breaking, develop control through Sparring, and are required to memorize 2 Bible Verses per Belt. Testings for new Belts are held on the last scheduled day of classes and are an additional fee, paid directly to CBBA.

Creative Studio: Techniques, Artists & Design grades 3-5	Art	Lindsey Poe	2:00 PM	3:00 PM	Cost: $300 This engaging art class for students in grades 3-5 builds upon foundational art skills while introducing more advanced techniques and creative thinking. Students will work with a wide range of art mediums—including watercolor, acrylic paint, oil pastels, drawing materials, collage, and mixed media—while deepening their understanding of the elements of art and beginning principles of design. Through interactive activities and artist studies, students will explore the works of famous artists, experiment with various styles, and develop their own artistic voice through guided projects and creative challenges. Books & Supplies Required No required textbooks. A set of Watercolors and a Watercolor Pad (Crayola or any other brand is fine). All other art supplies will be provided in class. Students are encouraged to bring a smock or wear clothes suitable for painting. Homework Requirements None Grading Not graded Communication Method & Frequency Method: Email Frequency: Weekly or as needed Families will receive updates with project highlights, techniques covered, and upcoming themes. High School Credit

Elementary Dance & Tumble grades 3-5	Performance Arts	Lauren Reel	12:00 PM	1:00 PM	Cost: $400 per year. You will pay $15 deposit here through homeschool life to secure your spot. Ms. Reel will contact you after registration to set up payment for the balance to be paid directly to Kernersville Dance Company. Elementary Dance & Tumble (Grades 3-5) This high-energy 55-minute class is perfect for dancers in grades 3-5—boys and girls welcome! Students will explore a variety of dance styles including ballet, jazz, and hip-hop, along with introductory tumbling skills. Class focuses on building strong dance fundamentals, coordination, flexibility, rhythm, and confidence in a fun and encouraging environment. Dancers will learn age-appropriate technique, exciting choreography, and basic floor skills while developing teamwork and performance skills. This well-rounded class is a great option for students who love to move and want to experience multiple styles in one class! Please note, our music and movement will always be appropriate. Ballet Shoes and active clothes are encouraged for this class. No dresses, jeans, or jewelry. This class will also have the option to perform in our annual recitals held in May 2027. More information to come on this.
Elementary Dance & Tumble grades K?2	Performance Arts	Lauren Reel	2:00 PM	3:00 PM	Cost: $400 per year. You will pay $15 deposit here through homeschool life to secure your spot. Ms. Reel will contact you after registration to set up payment for the balance to be paid directly to Kernersville Dance Company. Elementary Dance & Tumble (Grades K-2) This high-energy 55-minute class is perfect for dancers in kindergarten through 2nd grade—boys and girls welcome! Students will explore a variety of dance styles including ballet, jazz, and hip-hop, along with introductory tumbling skills. Class focuses on building strong dance fundamentals, coordination, flexibility, rhythm, and confidence in a fun and encouraging environment. Dancers will learn age-appropriate technique, exciting choreography, and basic floor skills while developing teamwork and performance skills. Empowered Young Women grades 9 - 12	Bible	Martha Poland	12:00 PM	1:00 PM	Cost: $275 In this year's class we will continue to be all about encouraging and equipping young women to thrive and grow as they walk fully into biblical womanhood. We will continue in our discipleship journey with series 2 of A Walk Through Time with Christian Women Heroes of Faith! Our curriculum is instructor created, and will be provided to each family prior to the start of each semester in a PDF file which should be printed and added to a 3-ring binder in preparation for class each week!

English I grades 9-12	Language Arts	Lindsay Darienzo	1:00 PM	2:00 PM	Cost: $325 English I provides students with a foundational study of American literature and composition. Over the course of the year, students will explore a variety of texts, including novels, short stories, and poetry. Each semester features a novel by an American author: The Call of the Wild by Jack London in the first semester and The Witch of Blackbird Pond by Elizabeth George Speare in the second. Students will also study selected American short stories by authors such as O. Henry, Edgar Allan Poe, and Langston Hughes, along with poetry by Emily Dickinson, Robert Frost, and Walt Whitman. Short stories and poetry will be provided digitally as assigned. Writing instruction uses Essentials in Writing, Level 9, guiding students through paragraph development, short compositions, and essays in narrative, descriptive, and analytical styles. Grammar, vocabulary, and effective communication skills are reinforced throughout the course, helping students express ideas clearly and thoughtfully. Supplies: Essentials in Writing Level 9 Worktext 2nd Edition (Apx. $45). Please use the provided link/order form and make sure to specify that you are taking English at Friendly Educators with Lindsay Darienzo. You only need the Essentials in Writing Level 9 Worktext—no additional materials are required.If you run into any issues or have questions, please reach out so we can get it resolved right away. https://essentialsinwriting.com/replacements/order-form/ The Call of the Wild https://www.rainbowresource.com/038063.html The Witch of Blackbird Pond https://www.rainbowresource.com/001408.html **Literature links provided for reference. Books can be purchased from rainbow resource, Amazon, Christianbook.com, etc. Studenst also need a 3-ring binder, dividers, and pens or pencils Homework requirements: Students will be required to complete a literature assignment and writing assignment each week. Grading: Percentage with a letter grade Method and Frequency of communication: Emails will be sent as needed, but at least once a month. For High School Classes only: 1 credit

Escape Room Logic Lab grades 6-8	Math	Stephanie Penick	2:00 PM	3:00 PM	Cost: $235 Do you love puzzles, mysteries, and cracking codes? In Escape Room Logic Lab, you'll solve escape-room-style challenges using logic, patterns, wordplay, and teamwork. Each week you'll hunt for hidden clues, break codes, untangle riddles, and work with friends to beat the clock. But the fun doesn't stop there—you'll also learn how to design your own escape room puzzles, test them on classmates, and improve them based on feedback. By the end of the course, you'll create a full escape room that other students get to play! If you enjoy thinking creatively, solving problems, and working as a team, this class is for you. Each week, learners tackle escape-room-style activities that blend math, logic, reading comprehension, and creativity. This class is perfect for curious minds who enjoy mysteries, games, and creative challenges while building real-world reasoning and collaboration skills.

Exploring Art: Imagine and Create grades K-2	Art	Lindsey Poe	12:00 PM	1:00 PM	Cost: $300 This hands-on art class invites students in K-2 grades to explore creativity through a variety of art media, interactive games, and engaging stories. Students will experiment with various materials, including watercolor, acrylic paint, oil pastels, crayons, clay, collage, and mixed media, while learning the elements of art—line, shape, color, texture, and form. Throughout the class, students will occasionally explore age-appropriate stories and studies of famous artists to inspire curiosity, creativity, and confidence. There will be an Art Show at the end of the year to showcase some of their favorite works! Books & Supplies Required No required textbooks A set of Watercolors and a Watercolor Pad (Crayola or any other brand will work just fine). All other art supplies will be provided in class. Students are encouraged to bring a smock or wear clothes that can get messy Homework Requirements No formal homework Grading Not graded Communication Method & Frequency Method: Email Frequency: Weekly or as needed Families will receive updates with class highlights, projects, and themes. High School Credit Not applicable

Fun With Letters ages 4-5	Preschool	Caroline McCormick	1:00 PM	2:00 PM	Cost: $250 Course Description: Each week the students will work on fun activities based on the letter of the week. They will practice writing the letter, have a craft based on that letter, and play some letter recognition games. They will learn to identify and name individual letters of the alphabet, typically focusing on visual recognition of letter shapes and their corresponding sounds. Throughout the year we will keep a notebook of the letters and by the end of the year they will have a letter profilo! Curriculum: Tutor created Supplies- 3 ring binder (1), Sheet protectors (25) Method and Frequency of communication: once a week emails
General Science grades 7-8	Science	Shannon Lee	9:00 AM	10:00 AM	Class Cost: $320 Class Description : In this class we will discover fundamental laws He has set in place when He created the universe and spark an interest in the fascinating world of science as we are continually introduced to our Creator and all his glory! Using Apologia's Exploring Creation With General Science student text we will introduce the topics of: History Of Science, Scientific Inquiry and the Scientific Method, Documenting and Interpreting, Scientific Analysis, Earth Science (touching on Astronomy, Geology, Paleontology, Meteorology and Oceanography), General Chemistry, General Physics, Life Science, General Biology, Marine Science, Environmental Science, Science and Creation. This class is formulated to have the students complete some background work at home to help remember and organize the concepts, so that in class we can solidify the concepts with discussion, pictures/videos, and fun weekly hands on activities/experiments that will come from both their text and outside sources. The goal is to create students who find a love for science, our world, and our Creator!Class Title: General Science 7th-8th grade Supplies: Apologia General Science 3rd Ed. Text Book, 1 Binder, Dividers, Notebook paper, pen, pencil, eraser, highlighter, ruler Homework requirements: Two-three hours a week average outside of the classroom. Grading: Recommended grade will be given at the end of the year along with each recorded assignment. Method and Frequency of communication: Communication will begin a week prior to the start of coop via email with the syllabus and reminders of class needs. During the semester, I will send touch in emails quarterly to summarize what we have done in class and any general reminders. If I need to reach out specifically, I will reach out as needed individually via email anytime during the year. Feel free to email me anytime during the year at Shannon.Lee1184@gmail.com. It is recommended to check email weekly in case I need to touch base outside of quarterly updates and reminders.

Geometry grades 9-12	Math	Jennie Weekley	10:00 AM	11:00 AM	Cost: $300 Using materials from Math-U-See, your student will progress through 30 lessons covering topics such as points, lines, circles, planes, angles, triangles, quadrilaterals, the Pythagorean Theorem, volume, surface area and proofs. Each week we will go over the lesson in class before your student returns home to do the rest of the worksheets and the test at home. They will read the next lesson in the book and bring the first worksheet and the test back for grading along with one sheet of homework. A project is due each semester and Unit Tests are taken in class. Please talk to the tutor before signing up as needed
Granny Hobbies for Kids grades 3-5	Home Economics	Ms. Elana Jane Fletcher	1:00 PM	2:00 PM	Cost: $320 Step back in time and slow things down in Granny Hobbies for Kids, a hands-on enrichment class that introduces children to classic, cozy skills passed down through generations. Students will learn beginner crocheting, embroidery, and cross-stitch, along with creative paper crafts such as making handmade note cards and simple scrapbooks. This class nurtures creativity, fine motor skills, focus, and appreciation for traditional handcrafts—all in a relaxed, joyful environment that celebrates doing things the old-fashioned way. Perfect for students who enjoy creating with their hands, working at a gentle pace, and learning skills they can use for a lifetime. *Supplies for all projects will be provided by the instructor.

Grossology grades 3-5	Science	Tyler Slabaugh	2:00 PM	3:00 PM	Cost: $340 Grossology: Inside the Human Body is an engaging, hands-on science course for 3rd- 5th grade students that explores how the human body works—using curiosity, critical thinking, and just the right amount of gross. Students investigate major body systems, including the skeletal, muscular, digestive, respiratory, circulatory, nervous, and immune systems. Through experiments, demonstrations, models, interactive discussions, and problem-solving activities, students explore how body systems work together to maintain our health and well-being. The course emphasizes scientific vocabulary, cause-and-effect relationships, and real-world connections such as nutrition, exercise, hygiene, and disease prevention. Age-appropriate gross topics (such as mucus, sweat, gas, and poop) are used to spark interest while reinforcing core life science concepts aligned with upper elementary standards. By the end of the course, students will be able to explain key body functions, describe system interactions, and apply their knowledge to make informed choices about health and wellness. Books and supplies: pencils, spiral notebook, folder, scissors, glue stick, colored pencils/crayons Homework: no Grading: not graded Method and Frequency of communication: weekly or as needed via email or text Preferred Min/Max students: min 5/max 12

Grossology grades 6-8	Science	Tyler Slabaugh	1:00 PM	2:00 PM	Cost: $340 Grossology: Inside the Human Body is a fun, fascinating, and sometimes gross science course designed for 6th-8th graders. It takes students on an adventure inside their own bodies! We explore what's happening beneath the skin— for example, how food turns into energy, the brain sends messages, and germs try (and usually fail) to make us sick. Students learn by doing. Through hands-on activities, experiments, models, and interactive challenges such as simulating digestion, explore how germs spread, and create body-system projects. Along the way, students uncover wow-that's-gross! facts about mucus, sweat, poop, microbes, and more, all while discovering how body systems work together like a super-team. This course encourages curiosity, teamwork, and laughter while building real science skills. By the end, students will not only understand how the human body works, but also why healthy choices matter—and why their bodies are amazing, resilient, and a little gross in the best way! Books and supplies: pencils, spiral notebook, folder, scissors, glue stick, colored pencils/crayons Homework: no Grading: not graded Method and Frequency of communication: weekly or as needed via email or text Preferred Min/Max students: min 5/max 14

Hands on Engineering Grades 6-8	STEM	Jennie Weekley	2:00 PM	3:00 PM	Cost: $250 Course Description: Hands On Engineering is a class that will focus on learning the engineering process which involves science, math and technology through hands on projects. We will deep dive into how things are made and make them ourselves. We will have challenges amongst our class as we compete to build the best products. For middle school, engineering will involve more thinking and creating on paper before beginning a project as well as more evaluating after each project. We will be addressing critical thinking, problem solving, communication with teammates, and learning how to deal with more complex problems as those are skills needed in our world today. Our projects will vary based on class interest but will include paper airplane launchers, marble machines, paper roller coaster, bridges and even an earthquake resistant house. Come join the fun! Course Prerequisites:None Homework Requirements: None Grading: None Course Credit: Method and Frequency of communication (how often will you communicate with families/students and via which method i.e. email): I will email once a week

High School Art 1 grades 9-12	Art	Kelsey Hargett	10:00 AM	11:00 AM	Cost: $320 Description: This is a beginner art class for high school students that will take them through the basics of art and principles of design. Learning and refining these fundamental skills will set the student up for success for pursuing continued education in the art and/or design field. During class students will be shown and will participate in learning a new principle through small exercises to work towards a bigger project for that module. At home students will be asked to keep completing similar exercises to practice the skill they learned that week and/or to work on their projects. FE Tutor, Kelsey Hargett, took art classes from 1st-12th grade ending with a 5 in AP Art. She studied at Liberty University and graduated with a BS in Graphic Design and a BS in Strategic Communications. Kelsey currently works at Lawndale Baptist Church as the Communication & Design Director where she gets to use her love for art and design to help bring glory to God and reach all peoples with the gospel. Supplies: Some paper materials will be provided but the following supplies should be purcahsed so projects can be worked on at home. Required: 9x10 Sketch book, 11x14 Mixed Media Pad, scketching/drawing graphite pencil set, art eraser, pencil sharpener, colored pencils, marker set, Sharpie variety pack, 12 ruler, scissors, and acrylic paint. Optional: larger mixed media paper for projects, any additional art supplies student may want to complete their project. Below is a link to a document with links to different supply options: Art Supply Links Homework requirements: Can range from 6-10 hours a week based off the students time put into the projects and practice. Grading: This class will be graded on a letter scale. Module exercises and projects will follow a grading rubric so students see where they excelled and what can be improved. Method and Frequency of communication: You will receive an email before the start of the school year and before the start of each module. For High School Classes only: 1.0 High School Credit

High School Boys Bible Study and Discipleship grades 9-12	Bible	Mr. Clayton Halls	9:00 AM	10:00 AM	Cost: $200 This class will be geared towards equipping and discipling high school boys to become Kingdom men. We will go on a journey througout the school year to develop Godly manhood, learn what the scriptures actually say a real man is, understand what it truly means to follow Jesus and be a disciple, and strengthen the foundation of faith of each student. We will discuss some hard and challenging topics but from a biblical perspective and nothing in the bible will be off limits. Real biblical men are warriors in the faith, not compromising, not sugar coated 2 hour a week christians that don't take a stand for their faith. Furthermore, a Godly man is one who produces fruit in their lives and has works to back up what they say they believe. Although they will indeed gain knowledge, understanding, wisdom and truth, the greater goal will be to lead them to putting into practice what they learn. And, to not just fill their head up with knowledge, but to hopefully renew their minds and mold their hearts to become more Christ-like in their day to day living, as well as encourage and instruct them along the path that God has created them to be on. Finally, we will be incorporating a bible study into the class which is called The Discipleship Playbook. (Cost of this is already included in the class price.) In this study, we will watch videos, have weekly homework and class discussions. There may be some class days where we pause the study and dive into wherever The Spirit leads.
Home Ec for High School Girls grades 9-12	Home Economics	Emily Seabolt	1:00 PM	2:00 PM	Cost: $350 Christian Home Economics: Faithful Living at Home This Christian Home Economics course is designed to equip students with practical life skills while grounding homemaking in biblical principles and God's design for the home. Through hands-on learning and real-world application, students will explore how daily tasks—such as cooking, budgeting, cleaning, organizing, and caring for others—can be acts of stewardship, service, and worship. Throughout the year, students will learn essential kitchen skills including safety, nutrition, recipe reading, baking, meal planning, and budget-friendly grocery shopping. They will develop routines for managing time, maintaining a clean and organized home, caring for clothing, and creating systems that bring peace and order to family life. Lessons will also cover emergency preparedness, home maintenance basics, non-toxic living, home remedies, and caring for oneself and others with wisdom and compassion. The course emphasizes Christian character through units on etiquette, hospitality, and joyful service, encouraging students to open their homes with generosity and intentionality. Seasonal topics such as Christmas homemaking, decorating on a budget, flower arranging, growing and preserving food, and homemaker hobbies help students cultivate creativity and contentment in every season of life. By the end of the course, students will gain confidence in managing a home with excellence, purpose, and faith, recognizing the home as a place where love is nurtured, resources are stewarded well, and Christ is honored in everyday living. *All supplies will be provided by the instructor with the exception of a three ring binder with a clear pocket cover and an occasional item from home.

Homesteading on the Farm Grades K-2	Science	Courtney Whelan	12:00 PM	1:00 PM	Cost: $235 Class highlight - Hatching Chicks and Growing Food! Course Description: Join me for an exciting journey into life on the farm! Students will learn about a variety of farm animals and discover all the ways they help provide for us. We'll also explore hands-on farm activities like gardening, bread making, and learning how food is preserved. Students will have the unique opportunity to observe baby chicks develop and hatch using an incubator. To explore plant growth, we'll use a hydroponic system to grow tomatoes and herbs. Through engaging books, fun crafts, tasty food projects, and simple science experiments, students will develop a lasting curiosity and appreciation for farm life and sustainability. They will also practice fine motor skills, early math, listening, comprehension, and phonics—all while having fun learning through hands-on activities. This class is designed to keep every student excited, involved, and eager to explore the wonders of the farm! Supplies Needed: Students will need a 3 hole punch binder, glue sticks, pencils, crayons or colored pencils and a pencil box or pouch. If student is taking more than one class with me only one binder with seperation tabs is needed. Course Prerequisites: There will be short book readings and crafts in most classes so being able to listen and follow simple directions will be helpful during this time. Curriculum: Instructor Created Homework Requirements: None Grading: NA Course Credit: NA Method and Frequency of communication (how often will you communicate with families/students and via which method i.e. email): Email as needed

Institute for Excellence in Writing (IEW) grades 6-8	Language Arts	Evelyn Bickel	12:00 PM	1:00 PM	Cost: $280 Institute for Excellence in Writing (IEW) (grades 6-8) Course Description: Using Andrew Pudewa's History-based curricula, students will be led through 9 units of various forms of writing. The course text and basis for instruction follows the Institute for Excellence in Writing's system (also known as I.E.W.) and helps encourage students to write both formally and creatively. Structure and style are emphasized in all units, and 30 lessons are included in the book. Our class does NOT cover all 30 lessons, but if students are interested in completing all of the lessons, students may turn in any papers/ assignments/ lessons not covered in class for editing. Students begin the course by learning how to take simplified notes and conclude it with students writing a 5-paragraph, researched essay, complete with a MLA Bibliography and implementing multiple structural and stylistic techniques. For all units, students take notes, make outlines, and compose both rough and final drafts on varying topics. All topics are historically related to United States History.. For more formal writing, students will practice summarizing references, composing the various parts of essays, and implementing different structural, stylistic, and literary techniques. For creative writing, students will retell narrative stories, write creative narratives using pictures as prompts, and practice inventive writing. Each week, parents should: -expect to aid your student(s) outside of class. -serve as an editor to your child(ren)'s drafts (or manage communication with another editor) weekly. Course Prerequisites: Students must be able to read at or above 6th grade level Curriculum used by instructor: I.E.W.'s United States History-Based Writing Lessons, Teacher's Manual Books and supplies required for purchase: + 1 wide, 3-ring binder with pockets in the front and back (for holding drafts & returned papers) + At least 5 dividers for the 3-ring binder (various handouts will be given out to aid students in reference and writing) + I.E.W.'s United States History-Based Writing Lessons*, 2nd Ed. Nov. 2019**: (New= ~$40 w/ shipping, but probably cheaper and on clearance due to a newer version being released). ISBN: 978-1-62341-326-2 **This edition is being updated, so please ensure your student gets the SECOND edition, published in 2019. * This product is consumable. Pages will be written in and torn out of the workbook, so it will not be resell-able upon completion of the course. https://iew.com/us-history-based-writing-lessons-student-book-only

Intro to Game Development & Coding grades 7-12	STEM	Mrs. Kenya Perkins, Terrell Perkins	1:00 PM	2:00 PM	Classroom Fee: $350 This full-year course combines the fundamentals of game design and development with introduction to programming concepts. Students will engage in hands-on projects and guided lessons to learn how games are planned, built, and tested using beginner-friendly tools, alongside foundational programming skills applicable beyond game development. Topics include programming basics, digital art, level design, sound, playtesting, and software development principles. No prior experience required. High School Credit:1.0 HS elective
Intro to Human Anatomy grades 9 - 12	Science	Martha Poland	9:00 AM	10:00 AM	Cost: $375 This year-long Intro to Human Anatomy class will include the study of the body's systems, disease, nutrition, etc. For our primary curriculum, we will use the Human Body Unit Study for HIGH SCHOOL from Gather 'Round. You may purchase the digital version and print yourself and bring to class in a 3-ring binder. You may enjoy this if you have younger kiddos who might like to do bookwork alongside older sibling or you may purchase the print version of the Human Body unit specific for High School. Course Prerequisites: N/A Homework Requirements: Approx 1-2 hours each week Grading: Letter Grade Course Credit: 1 Elective or Science Method and Frequency of communication (how often will you communicate with families/students and via which method i.e. email): Weekly or bi-weekly

Intro to Music grades 6-12	Music	Noah Darnell	9:00 AM	10:00 AM	Cost: $250 Instructor: Noah Darnell, Music Director, Lawndale Baptist Church Instructor Contact: Email: nvdarnell@lawndalebaptist.org Prerequisites: None Goal/Overview: To give students an introduction to basic music, music theory, music appreciation & history, and various early instrument methods. Required Materials: · Sing! By Keith and Kristin Getty, ISBN-10, 1462742661 · Primary Instrument, if applicable Objectives: · To equip students with a basic knowledge of music theory, including: o Pitch theory o Rhythm theory o Music language, markings, and keywords o Basic music transcription · To provide students with an early understanding of music history, genres, and the development of theoretical concepts (i.e. Baroque vs. Romantic, etc.) · To foster a holistic appreciation for music that encourages students to continue to develop in their own preferred instrument, and gives them a sufficient knowledge base to continue to effectively learn both their primary instrument and music in general · To introduce students to a variety of instrumental methods and sounds at a very basic level, so that those without a primary instrument may find one that they desire to pursue Grading: Class Participation 30%, Homework & Quizzes 30%, Exams 40% Homework Requirements: Weekly theory worksheets, Music appreciation/listening assignments Credits: 1.0 Elective Credit Communication: Updates and reminders via email once a week.

Intro to Personal & Business Finance grades 9-12	Math	Mrs. Kenya Perkins, Terrell Perkins	12:00 PM	1:00 PM	Cost: $300 Students will learn how to build strong personal finance skills, Christian money concepts (budgeting, debt avoidance), wealth building ideas (assets, liabilities, cash flow), and various real-world topics in financial awareness emphasized by popular financial authors and media journalists. In the second semester, students will learn business finance, how companies operate, manage money, and create value. The course concludes with a capstone project combining both personal and business financial planning. Classroom Fee: $300 (5 students MIN / 14 students MAX) High School Credit:1.0 HS elective
Introduction to Engineering Grades 3-5	STEM	Jennie Weekley	9:00 AM	10:00 AM	Cost: $250 Course Description: This engineering class is for those who love science, math and hands-on projects! Engineering is simply the application of science and math and experience to produce an object or a process that is useful. Home schoolers especially need to begin to experience their world and ask questions of how things work, create, test and fix their inventions. The basic objective of engineering is to use scientific methods and principles to produce useful devices and devices that serve all of us and learn how to work with a partner or in a group setting. We will learn by doing projects about all different areas of engineering including structural, civil, aeronautical, and more. Each week we will do an activity or make a project. Course Prerequisites:None Homework Requirements: None Grading: Pass/Fail Course Credit: 1.0 Credit Method and Frequency of communication (how often will you communicate with families/students and via which method i.e. email): I will email once a week

JOY Bible Class ages 4-6	Preschool	Caroline McCormick	12:00 PM	1:00 PM	Cost: $250 Course Description: JOY! Jesus-Others-You! In this class we will learn more about Jesus and how we can help others around us. Each week we will have a Bible story along with a craft and games. We will also learn about how we can minister to our friends and family. To go along with our FE theme verse, the kids will learn that even though they are young, they can make difference. Each semester we will work on a service project that will benefit our community. Curriulum: Play and Worship Preschool Bible Curriculum (Instructor provided) Supplies: Folder for handouts Method and Frequency of communication: once a week emails
Leadership grades grades 9 - 12	Leadership	Martha Poland	10:00 AM	11:00 AM	Cost:$275 The leadership class, for those who would like to take the class again, will have an entirely different format than the past two years! We will continue to hone our leadership communication and networking skills, but in this year's class, we will take the opportunity to travel through history, studying 24 great leaders who've paved the way for exemplary leadership before us. In honor of our country's 250th birthday celebration, during the 1st semester, we will learn leadership impact from some of our country's founding fathers and founding mothers. I'm excited for students to have the opportunity to learn from many of these great men and women in history, some of which they've probably heard of and some perhaps not. Our curriculum is instructor created, and will be provided to each family prior to the start of each semester in a PDF file which should be printed and added to a 3-ring binder in preparation for class each week!
Learning with the Littles ages 2-3	Preschool	Katryna Sloat	12:00 PM	1:00 PM	Cost: $150 Welcome to Learning with the Littles! Join us as we spend our time each week learning the alphabet, colors and a brand new animal friend each week! We will incorporate songs into what we are learning each week, along with coloring/crafts to take home to our parents.

Lego Robotics grades 6-8	STEM	Terrell Perkins, Mrs. Kenya Perkins	10:00 AM	11:00 AM	Class Cost: $400 Description: Lego Robotics introduces students to the exciting world of engineering, coding, and problem-solving through hands-on building challenges. Using LEGO® Education kits (Spike Prime or similar), students learn how to design, build, and program robots that can move, sense, and complete tasks. The course focuses on creativity, teamwork, and learning through experimentation. No prior experience is needed — just curiosity and a willingness to try new ideas. Course Goals: Students will learn to: Build sturdy and functional robotic structures Program robots using block-based coding Use sensors to help robots react to their environment Apply the engineering design process (plan → build → test → improve) Troubleshoot problems and improve their designs Work respectfully and effectively in teams Document their work in a simple engineering notebook Complete fun challenges inspired by real robotics competitions Supplies: Teacher provided Homework requirements: None Grading: Pass/Fail (based upon teamwork, class participation, and attendance) Method and Frequency of communication: weekly email (highlight concepts learned and new ideas upcoming)

Let's Get Moving: PE grades 3-5	Physical Education	Allison Key	1:00 PM	2:00 PM	Cost: $220 PE for grades 3-5. This will be an organized PE class each week that will be focusing on Fun and Movement and Age-Appropriate skill building. Students will also work on social skills and teamwork such as taking turns, following directions, cooperating with peers, and encouraging one another!! Kids of all abilities will be welcome! This class will emphasize personal progress and confidence rather than always competing or winning! My goal is to help children develop a lifelong love of movement and healthy activity!
Let's Get Moving: PE grades K-2	Physical Education	Allison Key	12:00 PM	1:00 PM	Cost: $220 PE for k-2. This class will be an organized PE class each week that will be focusing on Fun and Movement, Age-Appropriate Skill Building such as hopping, jumping, throwing, cataching, balancing,etc., Students will also work on social skills and teamwork such as taking turns, following directions, cooperating with peers, and encouraging one another!! Kids of all abilities will be welcome! This class will emphasize personal progress and confidence rather than always competing or winning! My goal is to help children develop a lifelong love of movement and healthy activity!
Life Skills grades 9-12	Home Economics	Jennie Weekley	1:00 PM	2:00 PM	Cost: $250 Course Name: Life Skills Course Description: Life skills include so many topics from personal and home organization, meal making, budgeting, interviewing for jobs, bible study, first aid, car care, investing and leadership skills. We cover even more topics including money management and can you afford to leave home. We begin the year looking at the BIG five year plan. With God's help, we look at all the aspects of their lives so far and think more about how to live independently and be thriving in the college years and beyond. One big focus for life skills is Jesus' greatest commandment. We will be learning all year how to incorporate how we live day to day and still adhere to love the Lord you God with all your heart, soul mind and strength and Love your neighbor as yourself. (Matthew 22:36-40).This class was designed by a homeschool mom with worksheets and projects to do in class and a few at home. Twice each semester, the students will prepare an entire meal for your family. This elective class is meant to cover a lot of topics that moms and dads wish their kids knew when they left the nest Course Prerequisites:None Homework Requirements: 1-2 hours each week Grading: A-F Course Credit: 1 High School Elective Credit Method and Frequency of communication (how often will you communicate with families/students and via which method i.e. email): I will email assignments once a week

Life Skills Lab: Tech & Money grades 6-8	Math	Stephanie Penick	1:00 PM	2:00 PM	Cost: $235 Want to feel confident using computers—and understand money at the same time? In this class, students will build essential technology skills while learning how money works in everyday life. You'll learn how to confidently use Microsoft Word, PowerPoint, and Excel while working on real-life projects about saving, spending, and budgeting. You'll create documents, design presentations, build spreadsheets, and turn numbers into charts—all while learning how to make smart money choices and stay safe online. This is a project-based class where you'll practice skills you'll actually use in school and in life. By the end, you'll combine everything you've learned into a final project that shows off your tech skills and financial smarts. A laptop computer with access to Microsoft Word, Powerpoint, and Excel is required. Weekly homework will include practicing skills presented in class and occasional projects. This class is not graded.
Little Chef's No Cook Cooking Class grades K-2	Home Economics	Lisa Stubblefield, Amanda Elliott	10:00 AM	11:00 AM	Class Cost: $275 Class Description : Join us for a hands-on, no-cook cooking adventure! In this fun and engaging class, young chefs will learn basic kitchen skills while creating simple, tasty recipes—no oven or stove required. Each week, we will begin with a short picture book related to our recipe (Example: Blueberries for Sal or If You Give a Mouse a Cookie). Students will practice important skills like measuring, mixing, spreading, assembling, and following step-by-step directions. Students will also work on creating their own cookbook throughout the year, using recipes from foods we've made in class together. Our recipes may include fruit parfaits, yogurt dips, snack mixes, mini sandwiches, and other easy treats kids can recreate at home. Along the way, we'll build confidence, encourage teamwork, and learn how different food fuel our bodies (Example: this chicken salad is full of protein, which helps build strong muscles or Did you know that avocados are good for your brain?), and make trying new foods fun! This class is perfect for little chefs who love to help in the kitchen and are excited to create their own delicious snacks. Please note: If your child has food allergies or sensitivities, please plan to stay in the class with them in order to help navigate those. Supplies: Students will need a pencil pouch or box with scissors, glue stick, pencils, and crayons or colored pencils to make our cookbooks. Homework requirements: NA Grading: NA Method and Frequency of communication: Email as needed

Math Detectives: Escape the Numbers grades 3-5	Math	Stephanie Penick	12:00 PM	1:00 PM	Cost: $235 Do you like solving mysteries and cracking codes? Math Detectives: Escape the Numbers is a hands-on, puzzle-based course where students use math to crack cases, uncover clues, and solve mysteries. Each week, students become math detectives, tackling engaging challenges built around patterns, logic, data, fractions, measurement, and probability. Through games, code-breaking, logic puzzles, and mini escape-room-style challenges, students strengthen core math skills while learning how to think critically, work collaboratively, and explain their reasoning. As the course progresses, students solve increasingly complex multi-step math mysteries and eventually complete a capstone escape room made entirely of math-based puzzles. This class makes math meaningful, playful, and exciting—perfect for students who enjoy problem-solving, teamwork, and learning through games. No weekly homework, but extra topic-relevant practice will be provided for home use. There may be projects that require some work outside of class. This class is not graded. Classroom requirements: TV and whiteboard

Math in Motion grades 4-6	Math	Debbie Lee	1:00 PM	2:00 PM	Cost $250 Class Title: Math in Motion: Hands-On Adventures with RightStart Mathematics Curriculum Used: RightStart Mathematics Textbook Needed: RightStart Mathematics Student Worksheets Class Description: Get ready to see, build, and move through math! In this interactive class, students will explore mathematical concepts using the RightStart Mathematics approach—filled with games, hands-on tools, and plenty of real-world connections. Each week, we'll tackle topics like geometry, fractions, multiplication, and problem-solving through visual models, manipulatives, and kinesthetic activities that make math come alive. Expect laughter, teamwork, and those aha! moments as we master math the fun, right-start way. This class will be ideal for 5th graders who love to think out loud, build with their hands, and learn by doing! You may also find it to be a good fit for your fourth through sixth grader. There will be instruction, review, practice problems, manipulatives, worksheet drills, games, and more in class each week. There will also be additional workbook pages assigned to do at home during each week and occasional assessments in class. Students will need a RightStart Mathematics Student Workbook. There will be a few tests in class through the year. Grading of this class will be percentage and letter grade on tests, but this is more for feedback. Final grading of this class is up to the parent. I plan to communicate via email to parents on a weekly or as-needed basis. Class size minimum is 4 students and maximum is 12 students. For classroom requirements, I will need a whiteboard. We will be writing math facts, word problems, and more on the board. We will also need tables and chairs so each student can write in their books and play games on a solid surface. I will not need a TV or sink for this class. Each student will need to purchase: RightStart Mathematics Student Workbook $23 Notebook, paper, pencil, calculator. There may be other costs to be determined later.

Middle School Dance grades 6-8	Performance Arts	Lauren Reel	1:00 PM	2:00 PM	Cost: $400 per year. You will pay $15 deposit here through homeschool life to secure your spot. Ms. Reel will contact you after registration to set up payment for the balance to be paid directly to Kernersville Dance Company. Middle School Dance (Grades 6-8) This 55-minute dance class is open to students in 6th through 8th grade and welcomes both boys and girls.Dancers will explore a well-rounded mix of ballet, jazz, and hip-hop, building strong technique, flexibility, coordination, and confidence. Class focuses on age-appropriate movement and clean, suitable music while encouraging self-expression and versatility across styles. Perfect for dancers looking to improve skills, stay active, and have fun in a supportive, high-energy environment. Ballet Shoes and active clothes are encouraged for this class. No dresses, jeans, or jewelry. This class will also have the option to perform in our annual recitals held in May 2027. More information to come on this.
MS Boys Bible Class: Exploring God's Word and Growing in Christ grades 6-8	Bible	Tommy Seabolt	12:00 PM	1:00 PM	Cost: $200 Middle School boys will learn how to study God's Word and apply it to their lives while reading through a New Testament reading plan. The goal will be to deepen their relationship with Jesus Christ through the study and application of His Word.
NC Agricultural Science grades 3-5	Science	Jennifer Farlow	10:00 AM	11:00 AM	Cost: $235 Students will dig deeper into the science of agriculture concentrating specifically on North Carolina's roots. We will explore the science behind soil, seeds, plants and animals. We will focus on using our five senses to enrich each and every topic we cover. Students will have the opportunity to grind wheat into flour, make butter, taste sugar cane/sorghum, grow their own sweet potato slips and so much more!
NC History grades 3-5	History/Geography	Jennifer Farlow	12:00 PM	1:00 PM	Cost: $235 How many tunnels are on the Blue Ridge Parkway? Where can you find Venus Flytraps growing wild in NC? What is our state drink? What is the oldest tree in NC? Who invented Pepsi? These are just a few of the questions we will answer throughout our yearlong study of North Carolina. Over the course of the year students will compile a North Carolina notebook filled with history, fun facts, legends, illustrations and more.

Once Upon a Girls Book Club grades 6-8	Language Arts	Kathy Henson	9:00 AM	10:00 AM	Cost: $260 There are many little ways to enlarge your world. Love of books is the best of all (Jacqueline Kennedy). This class is for girls who love to read! My goal is to encourage their love of reading by introducing your girls to a variety of books and genres. We will spend three to four weeks on each book, and time in class will be spent doing hands on activities including crafts, experiments, games, and cooking. I will also be introducing literary terms with each book, and we will be looking for ways to make Biblical connections to the themes. There is no grade for this class, and homework will only involve reading the assigned books. The average amount of reading each week will be 80-100 pages. If your daughter is a slow reader, she is welcome to use audio books or you can do the books as a read aloud. I encourage your daughter to finish each book, but there is no penalty if she can't. She will still be able to participate in class activities each week; however, there will be spoilers in the last session on each book. Here is the list of books for this year: The Lion of Mars by Jennifer H. Holm Song for a Whale by Lynne Kelly Adventures with Waffles by Maria Parr A Place to Hang the Moon by Kate Albus The Final Word by Janet Johnson The City of Ember by Jeanne DuPrau Absolutely Truly by Heather Vogel Frederick True Confessions of Charlotte Doyle by Avi I love to read, and I can't wait to share this joy with your daughters! Grading: None Communication: I will communicate as needed by email. There will be times when I may ask your daughter to bring in a random item for class. I will also let you know if we are doing something messy or cooking so your daughter can dress accordingly. Required Supplies: Purchase or check out a copy of each of the novels above Pencil/pen to write with
PE for Pre K ages 4-6	Preschool	Caroline McCormick	2:00 PM	3:00 PM	Cost: $225 The Pre K PE class is designed to help young learners build a strong foundation in physical activity through fun, age-appropriate movement experiences. Children will develop essential motor skills such as running, jumping, hopping, balancing, and throwing, while also learning teamwork, cooperation, and sportsmanship. Each class includes structured games, creative movement activities, obstacle courses, and dance exercises that encourage coordination, confidence, and a love for being active. Emphasis is placed on participation, positive attitudes, and following directions in a supportive and playful environment. By the end of the program, students will have improved their physical abilities, listening skills, and social interactions—all while discovering how much fun exercise can be!

Physical Education Class grades 6-12	Physical Education	Luke Earwood	2:00 PM	3:00 PM	Cost: $275 This year-long PE class is designed specifically for middle and high school homeschool students to build physical fitness, teamwork, and confidence through a variety of sports and activities. Students will learn the fundamentals of several team and individual sports while also enjoying structured fun days that encourage movement, cooperation, and sportsmanship. What students will learn and experience: * Fundamentals of basketball, pickleball, flag football, and soccer * Skill development including coordination, agility, endurance, and strength * Teamwork, communication, and good sportsmanship * Rules, basic strategies, and game play for each sport * High-energy fun days with rotating stations such as: o Relay races o Dodgeball o Group games and challenges o Other engaging physical activities This class provides a supportive and encouraging environment for students of varying skill levels, helping them stay active, try new sports, and enjoy physical education as part of their homeschool experience. Homework Requirements: None. All physical activity and instruction will take place during class time on Mondays. Grading:Pass/Fail (based on participation, effort, and appropriate behavior) Method and Frequency of Communication: * Communication via email * Additional communication as needed for schedule changes, weather updates, or announcements For High School Classes Only - High School Credit Value: 1.0 Physical Education credit (for students completing the full school year)

Physical Science grades 8-10	Science	Noah Darnell	12:00 PM	1:00 PM	Cost: $400 Instructor: Noah Darnell Instructor Contact: nvdarnell@lawndalebaptist.org Required Materials: Dincher, V. (2020), Exploring Creation with Physical Science, (4th Edition), Apologia Educational Ministries, Inc. Additional readings will be assigned as needed. Objectives: Upon completion of Physical Science, students will be able to: · Understand Scientific Principles: Master foundational physical science concepts · Develop Laboratory & Inquiry Skills: Conduct experiments, analyzing results and following lab safety protocols · Explain Real-World Applications: Identify and describe concepts in nature, technology, weather, etc. · Prepare for Higher Science Courses: Gain skills necessary for future biology, chemistry, and physics classes. Homework Requirements: Textbook reading assignments and practice questions, Weekly worksheet assignments Grading: · Class Participation 20% · Homework Assignments 20% · Lab Reports 20% · Quizzes 15% · Exams 25% Credits: 1.0 HS Science Credit Communication: Updates and reminders via email once a week

Pre-Algebra grades 7-8	Math	Dr. Donna Navey	1:00 PM	2:00 PM	Cost: $300 Course Name: Pre-Algebra for Grades 7-8 Course Description: Using materials from Math-U-See, your student will progress through the Pre-Algebra Objectives, such as understanding and simplifying exponents, using order of operations and absolute value, expanding understanding of place value, evaluating radicals, identifying the least common multiple and greatest common factor, and more. Each week will cover lesson details and seek to identify any gaps in your child's understanding of the material. The curriculum requires a structured review of the material at home using the textbook, lesson workbook, and video teaching. Samples can be found at Mathusee.com. Course Prerequisites: none Curriculum used by Instructor: Math-U-See Pre-Algebra Books & Supplies required for purchase by families: Math-U-See Pre-Algebra Student Workbook, Instruction DVD, Test Booklet, and Instruction Manual Pre-Algebra Level Up Base Set - Demme Learning Store Homework Requirements: Most weeks, students will complete 4 lesson practice sheets and a test at home. These should take 15 to 30 minutes each. There will be periodic comprehensive unit reviews in class. Duration: 28 weeks Grading: Parents are responsible for grading. The test booklet will not be used in the co-op class, so the pages can be utilized at home. Lessons will be introduced and practiced in class. Cumulative reviews of the material will be given to the students at various times during the year. Course Credit: 1 math credit Method and Frequency of communication: The instructor will be available for any questions and will communicate expectations regarding coursework.

Preschool Explorers ages 2-3	Preschool	Caroline McCormick	9:00 AM	10:00 AM	Cost $150.00 Preschool Explorers Welcome to Preschool Explorers, a joyful and nurturing environment where little learners grow through music, creativity, play, and everyday life skills! The music activities will encourage movement, rhythm, and self-expression. Children sing songs, explore simple instruments, and develop listening skills while building confidence and coordination. Our craft time sparks imagination and creativity. Through hands-on projects like painting, cutting, gluing, and building, children strengthen fine motor skills while expressing their unique ideas. Play time is an essential part of our class time! Structured and free play allow children to explore, problem-solve, practice sharing, and build friendships. Whether in dramatic play, blocks, sensory bins, or outdoor activities, learning happens naturally through fun. We also focus on important life skills such as cleaning up, taking turns, following routines, practicing kindness, and building independence. This could also include basic cooking skills.
Psychology 101 grades 9-12	Science	Martha Poland	1:00 PM	2:00 PM	Cost: $325 Course Name: Psychology 101 Course Description: This year-long Intro to Psychology class will include the study of the nervous system, including a sheep brain dissection, emotions, motivations, behaviors, memory, personalities, etc! Reading Detectives: Understanding Stories grades K-2	Language Arts	Allison Key	10:00 AM	11:00 AM	Cost: $225 Let's be Reading Detectives to learn AND have fun with discovering concepts of reading by using variety of picture books! Each week the teacher will read aloud a picture book, and we will be reading detectives and be on the search by using reading comprehension strategies as we go. These will include retelling the story in small groups, predicting the ending, comparing characters, making personal connections and so much more! We will have a few Extra Hands on Special days, which will allow us extra time to review some of our favorite stories through fun review games and crafts. Note: This is not a learning HOW to read class but learning strategies of what good readers do and how we interact with the wonderful stories we read. Let's place on our detective caps, pull out those magnifying glasses and find some reading clues as we jump into some beautiful and fun picture books together! Course Prerequisites: Being a good reader is NOT a prerequisite for this class, as the teacher will be reading the stories and helping with activities as needed! Students should exhibit basic letter recognition as well as fine motor skills such as holding writing utensils, coloring, cutting skills and glueing.

The Science and Art of Food grades 3-5	Science	Alex Perez	10:00 AM	11:00 AM	Cost:$320 Class description:This class will allow students the opportunity to explore unique experiments all involving some sort of food item. Each week we will have a fun, hands-on lesson, diving into interesting food facts/characteristics, science, nutrition, art and even history regarding the particular food topic. This class will encourage students to explore food in their home kitchens as more of a laboratory, developing a sense of curiosity and creativity! We will continue to explore a new round of experiments. So all who have taken this class previously will have a different set of lessons to embark on. My hope is that students will grow in their ability to see God in everything, to make God known in the scientific properties of our food and even how some food items can be used for non-food purposes.
Western Civilization grades 9-12	History/Geography	Josiah Bausum	10:00 AM	11:00 AM	Cost: $285 Course Description: From the brilliance and invention of the ancient Greeks and Romans, to the grandeur and beauty of courts of King Louis XIV of France and Queen Jadwiga of Poland, to the horror and tragedy of the First and Second World Wars, in the course we are going to witness the rise and fall of empires, ideas, religious convictions, and people's very way of life. I am excited to teach your students the history of the Western World. The is an old saying, Those who don't know their history are doomed to repeat it. I believe that the events and the people in history can show us far more than just what not to do. Yes, we will learn about the mistakes, pitfalls, and sometime just downright wickedness that led to a lot of the tragedies of the past. But we will also learn of the men and women who stood in the face of adversity and danger and choose to do what was right no matter the cost. The purpose of this course is to help your students gain an understanding of both of where things went wrong, but also how some of these historical figures can inspire us to be just a little bit better ourselves. Grading will be 60% from quizzes and 40% from participation. I will use the following grading scale: A: 100-90 B:89-80 C:79-70 D:69-60 F:59-0 I will reach out after each quiz to inform you of grades. Plus I will send out a midterm and final grade.
When I Grow Up ages 2-3	Preschool	Katryna Sloat	1:00 PM	2:00 PM	Cost: $150 Lots of children dream of becoming a firefighter, teacher, doctor, hairdresser or even a mommy! To see them pretend to be who they want to be at age 2/3 is the best view! Come join us as we learn all about what we want to be when we grow up! We will talk about our community helpers, have lots of hands-on fun and explore all the different people we could choose to be--when we grow up!
When I Grow Up ages 2-6	Preschool	Katryna Sloat	10:00 AM	11:00 AM	Cost: $250 Lots of children dream of becoming a firefighter, teacher, doctor, hairdresser or even a mommy! To see them pretend to be who they want to be at this age is the best view! Come join us as we learn all about what we want to be when we grow up! We will talk about our community helpers, have lots of hands-on fun and explore all the different people we could choose to be--when we grow up!

WordCraft grades 4-6	Language Arts	Debbie Lee	2:00 PM	3:00 PM	Cost: $285

Class Description: Join us for a mastery of the English language as we develop our creativity and explore literature together!

We will cover grammar building blocks such as prepositions, parts of speech, simplify sentence analysis, and strengthen vocabulary. Students will get to be grammar detectives as they explore, locate, and correct errors in the story of Robin Hood through the year. Students will also learn how to write well, think clearly, and express themselves persuasively. They will practice turning simple outlines into summaries of literarure, translating their ideas coherently, choosing vivid words, using stylistic techniques, and punctuating precisely through our Institute for Excellence in Writing component.

This will be a fifth grade level English language arts class, but you may find it to be a good fit for your fourth through sixth grader. There will be instruction, review, reading, writing, and more in class each week. There will be additional workbook pages assigned to do at home during each week to be reviewed in class. There will also be some reading and writing assigned from time to time, and the students will have a paper to write at the end of the year. We will work up to it together in class so the students will be confident that this is definitely something they can do!

Students will need the Easy Grammar Grade 5 Student Workbook, Fix It! Grammar Level 3 Student Workbook, and IEW supplies to be determined at a later date. There will be a few tests and written assignments in class through the year. Grading of this class will be percentage and letter grade on tests and papers, but this is more for feedback. Final grading of this class is up to the parent. I plan to communicate via email to parents on a weekly or as-needed basis.

Each student will need to purchase:

Easy Grammar Grade 5 Student Workbook $16

Fix It! Grammar Level 3 Student Workbook $19

IEW Student Resources TBD, after determining which course we will do for the year. Total student costs are $35 currently, and will be more after the IEW component is finalized.

World Geography: Around the World in 28 days! grades 6-8	History/Geography	Evelyn Bickel	10:00 AM	11:00 AM	World Geography: Around the World in 28 days!

Cost: $250

Course Description:

Could you locate the Kalahari desert? Did you know that there are 5 oceans? Would you believe that salt mines are located underneath Lake Huron? What mountain range is the longest in the world? Did you know Antarctica is actually a desert? Where is The Ring of Fire? How many countries in Asia end with stan? If you have a passport from the European Union, what countries would honor it? Could you explain why Greensboro is described as being in the Piedmont Triad?

When you enroll your student in this class, you and your student(s) can learn the answer to these and many, many more questions as we discover interesting facts about our wonderful world! This geography class, which is specifically designed for middle school students and covers 28 days of instruction over the course of a school year, will explore all 7 continents and 5 oceans, as well as many geographical terms. With a specific focus on differing forms of maps (political, industrial, economic, physical, thematic, etc.), students will also learn various facts about our world and the people, past and present, who've inhabited it. By comparing the cultures, history, and topographical features of locations all over the world, students will complete this course being able to develop both independent map-reading skills and atlas usage, resulting in being able to locate world-wide cities, countries, provinces, states, and territories.

Frequent quizzes and a short presentation each semester will aid in memorization and research skills. Class styles vary from lecture and note-taking to interactive/hands-on activities and projects. Each semester ends in review of all of the continents covered for that semester.

As Michael Palin proclaims, Geography explains the past, illuminates the present, and prepares us for the future. What could be more important than that?

Course Prerequisites:

Students must be able to read at or above a 5th grade reading level.

Curriculum used by instructor:

Rand McNally's Know Geography World Atlas, Grades 4-9; Ultimate Geography & Timeline Guide by Maggie Hogan; Trail Guide to World Geography, Middle School, by Cindy Wiggers (Student & Teacher's Manuals.)

Books and supplies required for purchase by families:

1.) Rand McNally's Know Geography World Atlas, Grades 4-9 https://tinyurl.com/2a2efe46 (~$15)

2.) Fine Point, Felt Tip Markers; 12-Pack Assorted Colors (OR something similar, just NOT permanent markers, like Sharpies, because I want the ink to be easily removable from hands and ESPECIALLY surfaces/tables!) We will need 12+ colors for mapping! https://tinyurl.com/mrxuubz3 (~$10)

3.) 1 wide, 3-ring binder for Geography Notebook (price varies)

4.) Pocketed dividing tabs for 3-ring notebook similar to this: https://tinyurl.com/mv8mrnp7

In-Class Supplies (provided by ME for use IN class, but mentioned in case you want access to these supplies at home. These are NOT REQUIRED, but I will use them in class periodically):

+ Place mats/laminated maps of the World and USA for in-class discussions and markings with dry-erase markers

World War I and II grades 6-8 | History/Geography | Lindsay Darienzo | 10:00 AM | 11:00 AM | Class Cost: $275

...We shall fight on the beaches, we shall fight on the landing grounds, we shall fight in the fields and in the streets, we shall fight in the hills; we shall never surrender. - Winston Churchill

Fall Semester - World War I
Step into the world of World War I as history comes alive in our classroom. Students will explore dramatic battles, powerful stories, and the sights and sounds of the era through literature, art, music, and authentic historical photographs. Interactive lessons, hands-on activities, and meaningful discussions will help students see how this global conflict shaped real people's lives. Each student will choose a soldier to follow and create a project that traces that individual's journey through the war—discovering the human side of history along the way.

Spring Semester - World War II
The spring semester launches students into the unforgettable events of World War II. From major battles to moving works of literature and wartime art and music, students will gain a rich understanding of this pivotal time in history. Through video interviews, students will hear powerful firsthand accounts from American soldiers, German civilians who experienced the war as children, and Holocaust survivors. To culminate the semester, students will research a soldier or historical figure and create a project that tells that person's unique World War II story—connecting the past to the present in a meaningful way.

Both semesters will include engaging activities, such as in-class simulations and escape rooms, to bring history to life.

Supplies: 3-ring notebook, dividers, pens or pencils, colored pencils

Homework requirements: The only HW is their research project each semester. Each week a piece of their project has to be researched...this may take 15-20 min per week once we start this process. More time may need to be taken closer to the projects due date. I would say this class has a very minimum amount of homework.

Grading: pass/fail

Method and Frequency of communication: Emails will be sent as needed throughout the year, but at least once a month you should see an email from me.

Worship Band grades 9-12	Performance Arts	Noah Darnell	10:00 AM	11:00 AM	Cost: $250

Instructor: Noah Darnell, Music Director, Lawndale Baptist Church

Instructor Contact: Email: nvdarnell@lawndalebaptist.org

Prerequisites: Please meet with Noah before enrolling your student in this class. At least 1 year of musical experience in chosen instrument is assumed.

Goal/Overview: To teach and equip students to lead, plan, and execute on musical worship as part of a band, learning skills both specific to their particular primary instrument and for general musical leadership and communication.

Required Materials:

· Sing! By Keith and Kristin Getty, ISBN-10, 1462742661

· Corporate Worship: How the Church Gathers as God's People by Matt Merker, ISBN-10, 1433569825

· Primary Instrument, if applicable

Objectives:

· Answering general questions regarding musical worship, such as:

o What is musical worship? (Ephesians 5:19)

o Why distinguish musical worship from worship in general?

o What is the goal of musical worship?

o Does God care how we worship? (Leviticus 10)

o How can I use my gifting to lead musical worship?

o What is musical leadership?

o What is stewardship? (1 Peter 4:10)

o How can I best steward my personal gifting?

o Why an emphasis on Psalms, hymns, and spiritual songs? (Colossians 3:16)

· Equipping students with a biblical theology and philosophy of worship

· Preparing students to both lead with and develop in their own giftings and abilities in individual and corporate contexts.

Homework Requirements: Weekly Practice (Assigned Songs & Instrument-specific notes)

Grading: Pass/Fail

Credits: 1.0 Elective Credit

Communication: Updates and reminders via email once a week.

Yearbook grades 7-12	Art	Katryna Sloat	9:00 AM	10:00 AM	Cost: $225

Course Name: Yearbook

Course Description: Students will learn to design, write, edit and photograph content to create a fun and memorable yearbook!

Course Prerequisites: none

Homework Requirements: There may be a time where homework assignments are given

Grading: n/a

Course Credit: n/a

Supplies: The Basics: pencils, paper :: A laptop would be beneficial to work on yearbook pages during class

Method and Frequency of communication (how often will you communicate with families/students and via which method i.e. email): As needed basis.
